# FOXES COMMUNITY AND WILDLIFE CONSERVATION TRUST

## 2022 ANNUAL REPORT

---

---

### **CHARITABLE GOALS**

Foxes Community and Wildlife Conservation Trust (FCWCT) was founded in 2005 with the dual objectives of supporting communities and conservation. The main objectives are to provide shelter, sustenance, education and medical care for vulnerable children and families, focusing on communities living in environmentally sensitive areas, such as those in the Great Ruaha River Catchment and Rufiji Basin Catchment but also rainforests and other habitats, enabling them to sustainably manage their natural resources; To curtail the spread of HIV/AIDS; To teach life skills, (language, fiscal, vocational and self-sufficiency) and to create supportive networks and opportunities for future generations.

### **CHARITABLE OBJECTIVE DESCRIPTIVE**

The FCWCT works across three sectors - Childcare, Education and Healthcare - to respond to the needs of the community and provide advocacy and access where it is needed most. Current projects in the Mufindi District include providing direct orphan and foster care at the Children's Village, overseeing the implementation of kindergarten classrooms in local villages, sponsoring vulnerable youth in school, training local community health workers and supporting local HIV/AIDS clinics. In addition, FCWCT is striving to protect the flora and fauna in the rainforests of Mufindi. Using an integrated, holistic, and far-sighted approach, these NGO programmes work towards empowering and involving the local community and not only provide immediate support but are designed to aid the recovery of the project area in the long term.

Keeping in step with new statutory requirements, we have updated our Constitution, registered on the newly created NGO's Information System (NIS) of the Ministry of Community Development, Gender, Women and Special Groups, and appointed two new Trustees to our Board: Nicco Fox (replacing Hillary Antony Luwanja who had previously passed away) and Mona-Liza Lottering as 6<sup>th</sup> member.

Our manager, Zilipa Mgeni, attended several regional and district meetings and conferences this year to ensure that we are well-informed of current guidelines and requirements.

## OUR PROGRAMMES.

### CHILDREN'S VILLAGE:

At the Igoda Children's Village (ICV) we have continued to look after and care for the orphaned and vulnerable children in our care, ensuring the health and safety of them and all our staff.

Tanzania's Government stipulates no children over 18 can remain in an orphanage. Also, some children fostered by the FCWCT have left the ICV to live with their relatives. Those who left but are continuing their education, living in the nearby villages with families, have been monitored regularly and we continue to support them with food hampers, procuring accommodation and/or paying their school fees, uniforms and books. They are:

Blastus Peter Nagala, 21;  
Damian Mathias Ngongolo, 6;  
Edwin Fredy Lutambi, 18;  
Fanuely Gorden Luwumba, 22;  
Eliya Musi, 18

Faustin Immanuel Kiwale, 5;  
Kaini Juma Kabonge, 17;  
Kaiza Aloyce Kiliwa, 17;  
Kastory Aloyce Kiliwa, 20;

Kelvin Joseph Magehema, 19;  
Magreth Bosco Vating'A, 19;  
Nache James Kisapi, 21;  
Tunae Endru Sanga, 20;

*Brothers Kastory and Kaiza Kiliwa*

*Edwin Lutambi & Eliya Musi*

There are currently 33 children at the ICV, 17 girls and 16 boys. All the children are attending school, except Halima and Hezron whose medical challenges prevent them from doing so. Sarafina Tengalakwi (19) who has been with us since 2015 has left school and our care in June 2022. She is now living with her aunt in Isipii village.

*Sarafina Tengalakwi (in blue), officially releasing the FCWCT from guardianship.*

### **BABY HOUSE:**

Here, our two house mamas, Christina Mvinge and Nuru Kalinga, cared for 7 babies. Two new babies (both boys) joined us this year: Amiri Lugusi and Mohamed Akandu. Both their mothers passed away and Mohamed's father is also unknown.

*Amiri Lugusi*

*Flora, Simon, Herieth, Akila and Kefa*

*Mohamed Akandu*

We will guide Amiri's father to take the necessary steps so that he will be able to care for his son once he turns 3, to enable us to reunite Amiri and his father.

### **EDUCATION:**

**Pre-Schooling:** In 2022 there were a total of 37 in the kindergarten where the children continue to learn and play with many children coming from local villages. Fourteen children graduated from kindergarten on the 7<sup>th</sup> of December. The kindergarten is also open to the ICV and staff members. When they go to primary school, they will have a good grounding for their formal education. There were also 8 in the nursery, and 3 in pre-kindergarten.

**Madisi Primary:** There were 26 children in the primary school. 5 Graduated standard seven, of which 4 joined Luhunga Secondary School and 1, Mgalo Secondary School.

**Luhunga Primary:** Two children attended this school.

**Madisi Secondary:** We had 1 secondary student who graduated and is awaiting results to continue studies.

**Luhunga Secondary:** 8 students attended.

**Changarawe Secondary School:** Isaya Kimeta, sponsored by Mufindin Ystavat (MY, meaning Mufindi Friends) 2022 finished Form V and joined Form VI.

**Madisi (Sawala) Secondary:** 1 student (Paulina).

**Mtinyaki Secondary School 2022:** 1 student (Enevina Kabonge)

**University of Dar es Salaam (UDS):** Fadhili Hamis, sponsored by MY graduated and joined the UDS in October 2021. He continued to his 2<sup>nd</sup> year in 2022.

2022	CV Boys	CV Girls	Local Boys	Local girls	Total
NURSERY	0	1	2	5	8
CATERPILLAR	0	0	0	0	0

<b>TOTAL</b>	<b>14</b>	<b>16</b>	<b>29</b>	<b>30</b>	<b>89</b>

*Our Kindergartners work hard and play hard*

*Graduation, December 2022*

### **The Vocational Training Centre (VTC):**

The VTC activities ran from January to December 2022 for YAM training courses. Four youths from the ICV benefited from attending these courses.

*Elikana, Zulea, Magreth, Anderson*

## HEALTHCARE AND SOCIAL WELFARE:

### Milk Powder Programme:

The Milk Powder programme is kindly sponsored by St Pius X Church in Bristol, UK - funds are created by volunteers' fundraising. Without this programme, many babies would not survive. Families of babies of mothers who pass away or are unable to feed them, cannot afford milk powder and come to FCWC for help. Until this programme started, babies were fed on a thick porridge-like drink known as uji, which is unsuitable to nourish such young infants.

We are notified of the need by our outreach team and discussions are held with the local village children's committees, to ensure that there are no other family members that can help.

**Fourteen babies benefitted from our programme.**

S/N	BENEFICIARIES	M/F	D.o.B.	ICV OR OUTREACH	LACTOGEN 1	LACTOGEN 2	COWBELL	STATUS

## **COMMUNITY OUTREACH:**

**13 Village Home Based Care volunteers** continue to visit villagers in the Ihanu, Mdabulo and Luhunga wards in the district. The volunteers receive regular training in first aid and keep up with advising villagers to continue their hospital visits for HIV/Aids testing and treatment. They also assess who may need a visit by a visiting doctor if they are unable to reach the local hospital, which for them might be a long way to go with the limited transport facilities. Individual reports are submitted to the HBC leader, who consolidates the information and reports back to the NGO.

### **STATISTICAL DATA OF PATIENTS VISITED BY HOME BASE CARE TEAM IN 13 VILLAGES FROM JANUARY TO DECEMBER 2022**

DISEASE/DEFORMITY	JAN	FEB	MAR	APR	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC	TOTAL

## **AGRICULTURE:**

The table below shows a summary of the harvested produce.

CV PRODUCTION 2022			TOTAL
January - December	Eggs		23,365
January – March	Vegetables	Poly-tunnel	304 Bunches
July – December	Vegetables	Poly-tunnel	232 Bunches
May – July	Avocados	Garden	2621 pcs
April	Fresh Maize	Poly-tunnel	20 Small buckets
October	Honey		17 Litres

*Avocados*

*Chinese cabbage*

*Children help with the maize harvest*

## **WILDLIFE CONSERVATION:**

At a time where we all face the realities of not adequately taking care of our planet, Chris Fox of the FCWCT and his team have continued to strive to nurture the rainforest in Mufindi, an area very important to the watersheds of the savannah wildlife habitats, east and west of us.

They have planted and continue to nurture well over 30,000 indigenous rainforest trees of varying species, in their forest enrichment programme, improving areas which have suffered environmental abuse over generations and replenishing species which have been selectively logged out, for different reasons, over time. This contributes to cleaner air and more water for the ecosystems of Mufindi and the surrounding areas.

Chris' team supports the environment with daily forest patrols over a forested area of 80 sq km, considerably reducing the levels of wildlife poaching, whilst alerting the relevant authorities to other environmental abuses. They have removed over 20,000 snares and traps from these forests, alleviating the suffering of a great number and variety of wildlife whilst also prolonging life. This year a thorough sweep was also done in the forests and valleys that surround the ICV where numerous traps were removed.

## **IGODA CLINIC:**

**Igoda Clinic Extension:** This project is nearing completion, with walls and roofs painted, windows installed, and floors and verandas completed. It will provide the existing Igoda Clinic with more facilities, including doctors' and nurses' accommodations to expand the facility to a wider catchment area. The extension is being sponsored by a very generous donor from Belgium, Yvo Vanderlinden, who, together with the Fox family, also sponsored the initial clinic. Yvo came to visit in October with his grandson Sam. They were welcomed by office bearers and other members of the community and treated to joyful dancing before inspecting the progress. Electricity is currently being installed in the staff houses and the interior finishings of both buildings are being completed.

*Courtyard of semi-attached houses*

*Roof going up!*

*Interior finishing*

*Two staff houses for doctors and nurses*

*Wards*

*Yvo and Sam's welcome*

### **YOUTH AGENCY IN MUFINDI (YAM), 2021-2024:**

FCWC led the way in tackling the HIV epidemic over the last 15 years but recognises that it has left behind many traumatised vulnerable young children who continue to need our help. So, we are delighted with a new partnership between the Helsinki Deaconess Foundation Institute (HDI) in Finland and FCWC in Tanzania enabling us to launch YAM (Youth Agency Mufindi) at the start of 2021 with MFA funding committed for 4 years. The YAM project is designed to help disabled children solve life issues enabling them to lead dignified lives and help vulnerable young people to take control of their lives through improved motivation, skills, and opportunities.

FCWC implemented this pilot project in our neighbouring 16 villages, conducting outreaches, needs assessments, rehabilitation, carer training, psychosocial support, agricultural and forestry training, entrepreneurship training, and wherever possible also helping address gender equality. We are working closely with local government wherever possible in advocating equal development and opportunity for vulnerable children and young people.

To achieve this, we have established a Youth Projection Team and Village Child Protection Committees (VCPCs), helping us to identify and deliver this project support and training and help solve the problems faced by disabled children and vulnerable young people.

We are working with the University of Iringa (UoI) and the Tanzanian Association for Professional Counsellors and Psychotherapists (TAPCAP) who help FCWCT by providing expertise in assessing needs, psychosocial support, and the training of trainers. INUKA (Southern Highlands Rehabilitation Centre) assists us with addressing the rehabilitation needs of the disabled. UoI also enhances our project with Entrepreneurship training.

The YAM Project is directed by Bruce Fox (FCWC trustee) and Laura Jarvilehto (Deaconess co-ordinator) and the team in Tanzania consists of the co-ordinator (Mr Patuka), project manager (Zilipa Mgeni), accountant (Barick Chelulye) and project officers Danford Mkumba and Ushindi Lunyali.

The Project has been growing steadily in the number of targeted groups/participants/beneficiaries in the community and the specific achievements attained this year are as follows:

## **Achievements of 2022:**

1. In the first quarter of the year, the Project Team (Female 1, Males 3. Total staff 4) underwent three days of project management training to assist them in preparing reports for donors, feedback questionnaires using Google Groups forms, and alternative approaches such as supporting young beneficiaries with mindset training. This training was conducted by a Reconstructed Living Labs (RLABS) team from Iringa.
2. In the same period, the Project Team received three days' training in project plans and management (reporting systems, financial templates, and collecting baseline data, etc) from the Finnish project team. Female 1, Male 3. Total 4
3. Project staff furthermore received training in Disability Employment approaches via MS Teams on 8 September by Sisko of the Finnish Association of Intellectual and Developmental Disabilities (FAIDD) who also described the approach used by Zanzibar Association of People with Developmental Disabilities (ZAPDD). Female 1, Male 3. Total 4
4. 4 Project staff, together with 18 VCPC representatives and 2 ICV staff members, received training in supporting youth with various disabilities in Zanzibar from the ZAPDD team. ZAPDD is a non-governmental organization which deals with children with developmental and intellectual disabilities established for the purpose of promoting the welfare of people with intellectual disabilities in Zanzibar. Female 11, Male 13, Disability 1. Total 24
5. Consultation with our auditor (Mr. Damas) helped to ensure FCWCT/YAM remains compliant and prepares all the necessary supporting documentation needed for the application for charitable status for tax purposes. Female 2, Male 3. Total 5
6. 170 Caregivers of children and youth with disabilities participated in a 3-day seminar at the FCWC's VTC. The seminar was presented by Dr. Jacobo of the INUKA Rehabilitation Hospital (on disability issues) and by Anastazia Nturu, a graduate of University of Iringa (on psychosocial support /mental health) to aid the caregivers in better assisting those in their care that are disabled. The number of participants exceeded the project target of 32 caregivers.
7. A District level conference was held on 22/09/2022 at the Igoda Primary football grounds. The theme of the conference was awareness about the impacts of teenage pregnancies, together with HIV awareness. The District Commissioner was invited as a guest of honour, but he had to send his representative. Aside from the Project team and Nicco Fox (FCWC trustee), guests included officials from the DED Office (Mufindi District) and all 16 villages, including 3 Ward Councillors, Ward Executive Councillors, Village Chairpersons, Village Executive Officers, pastors, VCPCs and many others. The Mkwawa Arts music group entertained participants with songs about HIV in between the speeches.
8. A mini conference (Youth meeting) was held at Ibwanzi village in Ihanu ward on 23/09/2022 to highlight the same messages about HIV awareness and negative impacts of teenage pregnancies.
9. During a VCPCs' meeting, we discussed project plans and progress, implementation challenges and the way forward.
10. 100 Youths and 32 VCPCs attended the 10-day entrepreneurship training conducted by the UoI and LED by Dr. Nzali. It was centralized training at the FCWCT VTC hall and the attendees were accommodated in the adjacent rooms of the VTC.

11. 180 youths (80 from the 2021 intake and 100 from the 2022 intake) attended 10 days of agricultural training by local experts in general farming techniques, horticulture, pig rearing, beekeeping, poultry rearing and avocado planting. This training also included case-study visits to nearby sites. After the training, 2 piglets with piglet starter food were distributed by FCWC YAM to each of the 180 participants so as to start up a revolving livestock scheme.
12. 180 youths (both intakes of trainees) received 3 days of mindset training before their Agricultural training. The mindset training, conducted by RLABS from Iringa, aims to teach young people about self reliance and using the locally available resources as a means of establishing businesses and improving livelihood.
13. Centralized training for tailoring and mechanics skills, organized by FCWCT YAM, was offered by local technicians and craftsmen at the VTC over 15 days. This was attended by 52 youths who acquired tailoring skills and 45 youths who acquired mechanics skills. After this initial training, trainees were placed with different craftsmen to do a 5-month apprenticeship and get hands-on experience to hone their newly acquired skills. 5 Male youths were placed at Fox Farm where they are gaining further knowledge and experience in mechanical work. 15 Youths are attending further tailoring training at the VTC. The remaining 160 youths (from the first and the second intake) are receiving skill-based training as apprentices in their villages.
14. 50 Female trainees from the first 2 cohorts of 180 youth attended the Forestry Value Adding training at the Private Forestry Programme (PFP) Mafinga for 15 days. This was double the number aimed for by the Project this year. They participated in different modules: 1. Introduction to Carpentry; 2. Plantation & Management Techniques; 3. Chainsaw and Harvesting Techniques; 4. Timber Processing; 5. Charcoal & Briquette Making and 6. Fire Control.
15. On 11 November the Project team received Disability Inclusion Training by an Abilis Consultant. The aim of this training was to improve perception of disability, understanding of discrimination and barriers to the disabled, and the capacity of Deaconess partners to implement disability inclusion in their projects to enhance equal access and participation of those with disabilities. FCWC aims to alleviate the negative attitudes towards disability, address the inequalities created by societal structures and ensure a human rights-based approach to participation for Persons with Disabilities (PWDs), recognizing PWDs as equal citizens with equal rights. Poverty creates disability, but disability also creates poverty, with 20% of the world's poorest population being PWDs (WHO: World Report on Disability, 2011).
16. YAM assisted 21 disabled children to attend the INUKA Rehabilitation Hospital. Some of them have been provided with supportive devices. A total of 13 supportive devices, including wheelchairs, toilet seats, stand and corner chairs, standing frames and walking frames were provided to those who could benefit from them, in addition to medication and other treatments for conditions such as rickets, diplegia, cognitive disability, epilepsy, visual or hearing impairment.
17. YAM assisted 30 disabled youths to be assessed by the INUKA team for their various disabilities. Five of them attend INUKA for rehabilitation, treatment, and equipment support. In addition, the team also assessed six disabled children, of which some were assessed for the second time. Three of these are required to go to INUKA for rehabilitation, treatment, and equipment support: Nelly and Patrick are getting intensive medical treatment and receiving surgical intervention for rickets and rehabilitation at INUKA where they will stay for more than three months. Josephat (14) fell into an open fire and his legs suffered extreme burns and became infected. The wounds progressed to gangrene. In June FCWCT sent him to INUKA Hospital where they managed to treat and save his left leg by removing the rotten flesh and changing the dressings daily but by the end of October it

became clear to a team of doctors, physiotherapists and the ortho prosthetic team led by Dr Godfrey that the only way to save his life was to amputate his right leg. After six months in INUKA's care Josephat was fitted with a prosthesis and discharged the end of December. He is still undergoing treatment.

*DC visits FCWCT and opens the psychosocial training course – YAM (Honorable Saad Mtambule)*

*Josephat – a brave young man*

*Pig rearing*

*Training tailors*

*Training mechanics*

### **VISITORS TO THE ICV IN 2022:**

*Yvo Vanderlinden* from Belgium has been a very generous donor and has visited us before with his wife. This year he brought along his grandson, Sam. The children in kindergarten were delighted with their visit and treated them to songs and dancing and insisted on Yvo joining, which he graciously (and gracefully!) did.

*Dr Walter and Eleanor Huber* came to say hello on their way to Zambia. Walter chairs the Merck Family Foundation, which, among other donations, gifted the ICV with the yellow school bus we are so proud of.

*Drs Bodil and Marie Lofstrom*, both dentists, were followed by their colleague, *Sam*. They work with *Dentists Without Borders* to bring dental hygiene awareness and other dental services to our community. The purpose of this visit was for Dr Bodil, who is retiring, to hand over to Dr Marie, who we hope to welcome back in 2023 with a team of dentists.

*Laura Jarvilehto and Eija-Riitta Kinnunen*, representing the Helsinki Deaconess Foundation in Finland that supports YAM, visited to see the progress of this programme.

*Yvo in kindergarten*

*Laura & Eija-Riitta*

*Marie & Bodil*

### **VOLUNTEERS IN 2022:**

We are very thankful for the individuals who selflessly volunteered to serve our community with their time and expertise this year:

- *Johannes Stangenberg-Haverkamp* – amidst his busy schedule, he expertly oversees our monthly accounting, co-ordinates our donor-funding and assists in financial management from Germany
- *Leena Pasanen* – Dr Leena has been with us for many years. This year she brought friends along and introduced them to the ICV. They showered our children with gifts and love. She served our community for 3 months, providing healthcare for the ICV and in Outreach programme.
- *Alexandra Kulmalahti* – Dr Alexandra's medical skills and compassion are very much valued not only at the ICV, but in the surrounding villages where she visited many Outreach patients to provide healthcare, and also took food to desperate families during her 6-week stay.
- *Leo & Mia Luz* – came from Germany to volunteer as assistants at our kindergarten for three months, from February to April.
- *Ella Hirsiaho* – she does fundraising in Finland and general work with the ICV children, and volunteered with us twice (over Easter & Christmas) in 2022. She arrived in Mufindi bearing gifts as always: hand knitted knitwear, hats, toys, shoes, sunglasses etc. donated by her and many friends in Finland. Her visits are a delight, and she immerses herself in entertaining the children and helping where she can. This year she taught the children how to sew on buttons.
- *Marion Gough*- as trustee of Orphans in the Wild in the UK, Marion not only co-ordinates and launches fundraising for specific needs and liaises with our donors, she also keeps the social media accounts up to date and works tirelessly on a variety of tasks.

*Alexandra*

*Mia & Leo*

*Ella*

*Marion*

*Leena & Zilipa*

*Johannes*

### **PARTNERS, SPONSORS, DONORS:**

Last, but by no means least, we want to extend our sincerest gratitude to everyone who works tirelessly here in the village and behind the scenes to make all of this happen by supporting us both financially and physically - we could not do without their combined efforts and generous funding and time.

In 2022 we were delighted to have received donations from the numerous individual visitors who came to the ICV and generously donated many assorted items and funds, enabling the Children's Village to keep going. We are grateful for each donation, more than words can ever express.

DATE	NAME/INSTITUTION	ITEMS DONATED
8-1-2022	Miriam Phiri-Hamilton from Zambia	Box of stationery: pens, pencils, erasers, crayons, rulers, exercise books, etc.
11-2-2022	Christina Kabonge	28 bunches of green vegetables
15-2-2022	Rehema Mgimwa	Mangoes and lemons
7-3-2022	Mia and Leo from Germany	Clothes, story books and pencils
28-4-2022	Ella Hirsiaho from Finland	Students' school shoes, sports shoes, rubber boots, clothes
28-4-2022	Ella Hirsiaho from Finland	ICV Christmas party foods and drinks
10-6-2022	Nick & Rebecca Loh from Singapore	Children's clothes and shoes, toys, and stationery
15-6-2022	Fatina Nyigo	Sugar, soap, flour, petroleum jelly and fresh maize
22-6-2022	Merel Doman	Children's clothes and 1 bag
22-7-2022	Uchungu Kilendi	Beans 6 l, avocados 6 pcs, soap 1 bar, petroleum jelly 1 pc and clothes Tsh 40,000/=
15-8-2022	Glorious Lugoya	40 kg rice

10-9-2022	Monica Kihundo	Tsh 10,000/=
30-9-2022	Miriam Phiri-Hamilton from Zambia	Lactogen 1, 10 tins and lactogen 2, 10 tins
18-10-2022	Naomi Mwagala & family	Sugar 7kg, juice 2 cartons, soap 10 bars, salt 10pkts, Foma 5 kg, toothpaste 12, petroleum jelly 12 tins
24-10-2022	Ester and Lauren	Clothes and calculators
6-11-2022	Millen relatives	Sugar 1kg, soap 1 bar and clothes
23-11-2022	Amiri's father	Sugar 1kg, soap 1 bar and clothes
27-11-2022	Novavicta Mtavangu	Sugar 3kg, biscuits 1 box and breads many pkts
1-12-2022	Mafinga Childcare Centre	Sugar 5kg, salt 4pkts, soap 10 bars, biscuits 1 box and maize 60 l

*Local donors (Naomi Mwagala Family)*

In addition to these individuals, we acknowledge and express our gratitude and appreciation for the generous financial donations, grants and project sponsorships from:

- African Book Box (Canada): <https://www.africanbookbox.org/>
- Daniele and Christoph Berglar Foundation (Germany): <https://www.berglarfoundation.com/>
- Deaconess Institute (Finland): <https://www.hdl.fi/>

**To every donor, volunteer, and supporter, we thank you for  
continuing to make this happen!  
From all of us here at Foxes Community and Wildlife  
Conservation, the children of the Igoda Children's Village,  
and those community members benefiting from your  
generosity - a huge**

**THANK YOU!**

Signed:

Dated: 13<sup>th</sup> February 2023

Mary Susan (Vicky) Fox – Chair of the Board of Trustees

We are only able to operate this charity and give vulnerable children and foster families in Mufindi a chance at a brighter future through your generous donations. To help support our work, please use this link.
